Professional Experience of 1.5 years in .NET Full Stack Development at *Progience Technologies*

CIMS – *Consumable Inventory Management System*

- .NET 6.0 MVC Web Application designed for Forensic domain. The application mainly focuses on organizing labs, chemicals, storages and tracking chemicals in terms of Usage and their procedures to check quality, composition etc.

LIMS plus v5

- It is a Forensic application which consists of integration of 4 major applications (1 web application and 3 API applications). V5 is a case management tool providing versatile software to leverage the power of technology with numerous customizable features like evidence tracking, analytical results and lab management information to provide a clear view of your laboratory and every case in it.

LIMS plus DNA

- DNA is a stand-alone DNA application designed to reduce DNA backlogs by automating forensic sample processing for both casework and databanks as well as automating the delivery of DNA profiles to local, state, and national databanks.
